

Supplement No. 2: The Competence of the NL Units as of 1st June 2019

1.0.0 Library Collections and Services

It is a unit on the level of a sector (in Czech *sekce*), managed by a deputy director.

It systematically acquires, catalogues, manages, and preserves National Archival Collection, Universal Library Collections and Study Collections. It manages Reserve Collections. It provides complex public library and information services related to the aforementioned collections and to the external collections and information sources as well. It serves as the National Bibliographic Agency and the CIP Agency, the National ISBN/ ISMN Agency. It serves as the National Centre of Interlibrary Loan (ILL) Services of the Czech Republic and the National Centre for International Exchange of Official Publications. It is the centre of the Union Catalogue of the Czech Republic and the centre of the National Name and Subject Authorities. It makes comments, suggestions, proposals and recommendations concerning cultural heritage in the legislative and normative processes. Through the mediation of particular professional units, it guarantees, within the sphere of its competence, the conceptual, coordination, and methodical service and control as well as cooperation on national and international levels, and participates in research and development.

1.1.0 Acquisitions

It is a unit on the level of a division, managed by a director.

In accordance with the determined profile of acquisition (CONSPECTUS), it systematically acquires documents to the National Archival Collections, the Universal Collections, and the Study Collections. It guarantees parallel and retrospective acquisition of domestic documents (except for periodicals) and selective acquisition of foreign documents (except for purchase and gifts of periodicals). It keeps primary records of the acquired documents. It is the National ISBN/ ISMN Agency in the Czech Republic and the National Centre for International Exchange of Official Publications. Within the scope of its professional competence, it provides coordination, methodological, advisory and consultancy services, and authorized to do so are also the individual departments within their scope of competence. It participates in research and development.

1.1.1 International Numbering Agencies

It is a unit on the level of a department, managed by a head.

It serves as the National ISBN/ ISMN Agency in the Czech Republic for the systems of international standard book and music numbering. It cooperates with the International ISBN and ISMN Agencies and with other national and group agencies. It participates in production and revision of international ISO standards for the sphere of ISBN, ISMN.

1.1.2 Domestic Acquisitions

It is a unit on the level of a department, managed by a head.

Based on the current regulations, it acquires legal deposit copies of non-periodical publications and checks their complete submitting. By purchase or through gifts it acquires other copies of domestic documents for particular collections and workplaces. Retrospectively, it acquires the missing titles of domestic documents. It keeps primary records of newly acquired domestic documents. Based on the legal deposit copies, it prepares official retrospective statistics of the publishing production in the Czech Republic for the field of non-periodical publications.

1.1.3 Foreign Acquisitions

It is a unit on the level of a department, managed by a head.

It acquires foreign documents for particular collections and workplaces by means of purchase, interlibrary exchange and gifts. In coordination with the Periodicals Department, it acquires foreign periodicals through interlibrary exchange. It functions as the National Centre for International Interlibrary Exchange of Official Publications. It guarantees for the NL the compliance with the agreements on international interlibrary exchange of publications. It manages the exchange collections. It keeps the primary records of newly acquired foreign documents, except for periodicals.

1.2.0 Bibliography and Cataloguing

It is a unit on the level of a division, managed by a director.

The basic mission of the division is to effectively process the modern library collections. It serves as the National Bibliographic Agency and the CIP Agency. It is the centre of the Union Catalogue of the Czech Republic and an administrator of the National Authorities. It monitors and makes available the international standards for bibliography and cataloguing, and consequently, it creates and implements the unified cataloguing policy. It cooperates with libraries, institutions, and professional establishments in the Czech Republic as well as abroad, and is responsible for the NL participation in joint projects and for the observance of particular agreements. Within the scope of its professional competence it provides coordination, methodological, advisory and consultancy services, and authorized to do so are also the individual departments within the scope of their competence. It participates in research and development.

1.2.1 Descriptive Cataloguing

It is a unit on the level of a department, managed by a head.

It is responsible for descriptive cataloguing of the domestic and foreign production of books and some types of continuing resources of the 20th and 21st centuries acquired to the NL collections in accordance with the valid international / national standards. It is charged with descriptive and subject cataloguing of the domestic and foreign production of books and some types of continuing resources of the 19th century. It is a subadministrator of the database of books and serials within the NL electronic catalogue and the Czech National Bibliography. It works as the National CIP Agency (Cataloguing in Publication). It coordinates the projects of shared and cooperative cataloguing of Czech books. It is a coordination, methodological and consultancy centre for the sphere of descriptive cataloguing and name authorities, and it participates in research and development activities. Included in this department is the Section for OPAC Administration, which provides operative re-cataloguing of requested uncatalogued NL collections (in Czech: REŽIFO) and coordinates particular activities related to the administration of the NL Catalogue database within the National Library.

1.2.2 National Subject Authorities and Subject Cataloguing

It is a unit on the level of a department, managed by a head.

It systematically builds up national subject authorities files. It is responsible for subject cataloguing of domestic and foreign production of books and some types of continuing resources accessed into the NL collections in accordance with valid international / national standards. It is the administrator of the Czech National Subject Authority File within the Czech National Bibliography and the NL electronic catalogue. It is the administrator of subject access files of the NL electronic catalogue. It coordinates projects of shared and cooperative cataloguing of Czech books in the field of providing subject access. It serves as the National Agency for Translation and Access to the UDC classification system (UDC-MRF).

1.2.3 Special Documents Cataloguing

It is a unit on the level of a department, managed by a head.

It is responsible for both descriptive and subject cataloguing of special documents (electronic sources on physical carriers, graphic documents, cartographic documents, microdocuments, video and audio recordings) acquired to the NL collections according to valid international/ national standards. It is the administrator of the database of special documents in the NL electronic catalogue and the Czech National Bibliography.

1.2.4 National Name Authorities

It is a unit on the level of a department, managed by a head.

It systematically builds up files of national name authorities. It is an administrator of the National Name Authority database within the NL electronic catalogue and the Czech National Bibliography. It coordinates the cooperation of Czech libraries in building and using the National Name Authority Files. It is responsible for the content accuracy and uniformity of related access files to bibliographic records in the NKC database (NL online catalogue).

1.2.5 Union Catalogues

It is a unit on the level of a department, managed by a head.

It builds up and administers the national Union Catalogue of the Czech Republic; on the basis of valid rules it organizes cooperation of participants in CASLIN – Union Catalogue of the Czech Republic (hereinafter Union Catalogue). It organizes the acceptance of records of printed and special documents, catalogued on the level of monographs and serials, into the Union Catalogue, including their quality control and removal of duplicates. It provides the allocation of siglas (i.e. location marks) and administers their system. It administers a directory of libraries and information institutions in the Czech Republic and provides access to it.

1.2.6 Retrospective Conversion

It is a unit on the level of a department, managed by a head.

It coordinates and technically supports retrospective conversion of catalogues of both the NL and other Czech libraries, including a professional guarantee of the PLIS 5 Subprogramme - RETROKON (PLIS – Public Library and Information Services). It participates in research and development within the scope of its competence.

1.3.0 Public Services

It is a unit on the level of a division, managed by a director.

In accordance with the NL Rules and Regulations, it provides complex public library and information services to library users. It builds up a system of general and specialized reading rooms with reference libraries and reference collections. According to the determined profile of acquisition (CONSPECTUS), it ensures the system of acquisition and cataloguing of domestic and foreign periodicals. With regard to the content, it participates in the NL collections acquisition, namely the Universal Collections and Study Collections. It is the National Centre of Interlibrary Loan Service in the Czech Republic. Within the scope of its professional competence, it provides coordination, methodological, advisory, and consultancy services. Authorized to do so are also individual subordinate units within the scope of their competence. It participates in research and development work.

1.3.1 Reader Services

It is a unit on the level of a department, managed by a head.

In accordance with the NL Rules and Regulations, it provides check-out loan services from the Universal Collections and Study Collections in the Main Hall, it provides professional and methodical information on the NL collections and develops individual and collective forms of work with users. It keeps files of the NL registered users and administers an automated loan system. It keeps records of the lost loans and takes care of their replacements, it prepares documents to claim them legally. It offers self-service copying and provides photocopying and other reproduction services made to order. It is responsible for a central cash register for the NL users. It participates in acquisitions to the Universal Collections and Study Collections with regard to their content.

1.3.2 Reading Rooms

It is a unit on the level of a department, managed by a head.

In accordance with the NL Rules and Regulations, it provides services concerning check-in loans from the Universal Collections, Study Collections and the Archival Collections kept in the Klementinum to the General Reading Room, Scholars Reading Room, and Social and Natural Science Reading Room. It participates in administrative management of this part of the collections circulation. It provides access to electronic documents on solid carriers, selected network electronic information sources and internet. It builds up reference libraries and reference collections in individual reading rooms and coordinates their building within the direct services in the competence of the Public Services Division. It builds up information tools related to the collections in its administration. It provides information and consultancy service, especially with regard to social and natural sciences, self-service copying, photoduplication and other reprographic services made to order.

In the fields of social and natural sciences, it cooperates with bibliographic and documentation departments. With regard to the content, it participates in acquisition to the Universal Collections and Study Collections.

1.3.3 Reference and Interlibrary Loan Services

It is a unit on the level of a department, managed by a head.

In accordance with the NL Rules and Regulations it provides mainly reference services, interlibrary loans (ILL) and other specialized services in the NL Reference Centre and the ILL Reading Room. It provides self-service copying and mediates photocopying and other reproduction services made to order. It provides access to electronic information sources and internet and organizes training to work with them. For the remote users, it provides services both in the classic way and electronically – including electronic document delivery (EDD) and virtual reference services – Ask your library. It builds up and administers a reference library and the Reference Centre collections, it builds up the reference information system of relevant information sources. It functions as the National Centre of ILL Service in the Czech Republic. Within the Programme of Universal Availability of Publications (UAP), it guarantees access to domestic printed production. It represents the ILL Service in the Czech Republic in negotiations with national centres of other countries and international organizations. It is a retrieval centre in the National Library. It participates in acquisition to the Universal Collections and Study Collections with regard to the content.

1.3.4 Periodicals

It is a unit on the level of a department, managed by a head.

Based on the rules and regulations in force, it acquires legal deposits of printed periodicals and controls the completeness of their depositing. By purchase, exchange - in cooperation with the Foreign Acquisition Department - and gifts, it acquires domestic and foreign periodicals for particular collections and departments. Retrospectively, it acquires missing periodical titles above all of the Bohemian character. It keeps the primary and continuous records of acquired periodicals. Based on legal deposits, it completes official complex statistic files of the printed periodical publishing production in the Czech Republic. It provides descriptive and subject cataloguing of printed periodicals in accordance with valid international / national standards. According to the NL Rules and Regulations, it provides access to contemporary Czech and foreign periodical literature in the Periodicals Reading Room. It provides circulation services, self-service copying as well as photoduplication and other reproduction services made to order. It provides access to selected information sources. It administers open access collections and a collection of unbound periodicals.

1.3.5 Services Development and Technical Support

It is a unit on the level of a department, managed by a head.

It provides technical support to project leaders and provides organizational, technical, and administrative support to direct services in the competence of the Public Services Division and other NL departments and divisions. It provides reprographic and photoduplication services made to order. It secures photographic documentation of the NL.

1.4.0 Collections Management

It is a unit on the level of a division, managed by a director.

The basic mission of the division is to effectively administer, build up and preserve the NL modern book collections, i.e. the National Archival Collection, Universal Library Collections, and Reserve Collections. The division is comprehensively engaged also in other professional activities connected with the organisation, revision and storage of the aforementioned collections. It is responsible for the selection and preparation of the NL modern library holdings for digitization; it coordinates digitization activities within the wide range of Czech libraries and other institutions. Within the scope of its professional competence, it provides conceptual, coordination, methodological, advisory and consultancy services to other organizations including the Ministry of Culture of the CR; authorized to do so are also individual departments within the scope of their competence. Staff of this division participate in research activities of the NL in the field of permanent preservation, effective management, digitization and availability of modern documents including a new area of the so-called digital humanities.

1.4.1 Collections Organization

It is a unit on the level of a department, managed by a head.

It is the output place of the cataloguing line, i.e. by means of providing new accessions with shelfmarks it organizes the arrangement of library collections in stacks and makes their adjustment, it proposes changes in the system of shelfmarks, organization and building up the collections, it manages local catalogues and lists. It makes corrections and redactions of selected records in OPAC, it provides documentary evidence and arranges for binding of volumes according to the agreed criteria in an internal or external binding office; it

participates in checks of the completeness of accessions passed through the processing lines and sends the results to particular departments.

1.4.2 Collections Revision

It is a unit on the level of a department, managed by a head.

It makes routine periodic and occasional revisions of library collections in accordance with valid legal regulations, it reviews the cases of temporarily missing library units, it submits the units to be written off and, when approved, it writes them off the NL collections. Based on the results of revisions, it prepares materials for up-dates and acquisitions to the Universal Collections, it participates in searches for replacements of library losses. It selects and marks library units that need special preservation and builds up a collection available in a special protective regime. It submits proposals for reformatting the most damaged publications and keeps records of the progress of their further processing. It monitors and registers moves of library collections for the needs of reference libraries, it registers deposited collections, revision losses, write-offs and other card indexes for the need of the revision including their gradual transfer into automated databases.

1.4.3 National Archival Collections Management

It is a unit on the level of a department, managed by a head.

It builds up, protects, permanently preserves and in accordance with particular regulations it provides access to the National Archival Collections, i.e. the archival collection of domestic and foreign Bohemical documents, both printed and non-printed ones, including the periodical literature. It is an output department of the processing line for the National Archival Collections; it provides signs and adjustments, it selects publications to be bound, and builds up local catalogues and card indexes. It participates in checking the completeness of accessions through the processing lines and sends the results to particular departments. It proposes the individual documents and their sets to be included in the National Archival Collections. It provides bibliographic information, consultancy and advisory services in the field of Bohemical literature of the 20th and 21st centuries. It gradually transfers the data about library units kept in the National Archival Collections into the online database. It manages the operation of the special National Archival Collections Reading Room. It cooperates on projects focused on digitizing library holdings.

1.4.4 Universal Collections Management

It is a unit on the level of a department, managed by a head.

It manages the Universal Library Collections and the Study Collections and participates in their organization. It is responsible for their purposeful and safe storage as well as doing checks in this sphere; it submits proposals for measures to particular organizational units. It provides access to the Universal Library Collections, particularly it delivers the requested items from the stacks, puts the returned volumes back to their proper places and shelves new accessions, it collaborates on their adjustment and organizes moves of the collections. It participates in entering the data about damaged and reformatted titles into OPAC and it is involved in surveys of the collections condition and their minor repairs. It carries out basic revisions of arrangement in individual shelfmarks.

1.4.5. Central Depository Library

It is a unit on the level of a department, reporting directly to the NL Collections Management Director. It is responsible for building a new Central Depository Library, the transformation of the existing NL Reserve Collections into the Central Depository Library and for its future management and acquisition. It guarantees the operation of the *Virtual Depository Library* application concerning its content and methodology. It negotiates with other public libraries about the methods of discarding documents from their holdings, it actively takes over these documents and jointly decides about their use in the NL collections.

1.4.6 Strategic Planning of Library Collections Digitization

It is a unit on the level of a department, managed by a head.

It participates in forming the conception and strategy of digitization of non-historical library collections on both national and international level. It coordinates activities of libraries and other memory institutions, publishers, scientific and professional institutions concerning strategic decisions related to the selection and process of digitization of library wholes and partial collections from the point of view of the standards used

and with regard to the access to them through networks or mobile readers. It prepares research and development projects focused on the development of tools, procedures and methodologies in this field and it is involved in their implementing. It ensures the promotion and application of results of the research projects in the form of lectures, presentations, publishing activities and it participates in the training of professionals. It provides organizational back-up to the operation of the National Programme VISK 7 (Public and Information Services of Libraries).

1.4.7 Preparation of Documents

It is a unit on the level of a department, managed by head. It selects and prepares library documents for digitizing, it checks their physical condition and the state of cataloguing, it examines duplicates of the selected documents. Based on performed basic findings it decides on further cataloguing. It lends documents in ALEPH System and keeps records on the selected documents in the Register of Digitizing. It creates basic data files (metadata) for further processing. In its work it adheres to agreed standards and recommendations. Within the scope of its competence it proposes methodology, system changes and standards, and it provides metodological and consultancy service. It is involved in implementing the IOP Project (Integrated Operation Project) – Creation of the National Digital Library and in other national and European projects, it participates in research and development.

1.5.0 Collections Preservation

It is a unit on the level of a division, managed by a director. It is responsible for complex preservation and care of the physical condition of library collections. Its activity is focused on monitoring climate parameters and cleanliness of depositories for library collections storage; on individual and mass conservation and restoration of library collections, bookbinding and other preservation activities. It is involved in planning and implementing preventive measures against accidents and natural disasters and coping with their consequences. It submits observations, initiatives, proposals, and recommendations within the bounds of legislative and normative process. It collaborates with libraries, institutions and professional establishments both in the Czech Republic and abroad, and is responsible for the NL participation in joint projects and compliance with the particular agreements in the sphere of library collections preservation. Within the scope of its professional competence, it provides coordination, methodological, advisory and consultancy service. Authorized to do so are also individual departments within the scope of their competences. It participates in research and development.

1.5.1 Development and Research Laboratories

It is a unit on the level of a department, managed directly by the Division's Director.

The activity of the department is focused on initial analysis of the condition of damaged books, such as determining Ph values, i.e. acidity of paper, shrinkage temperature of cellulose fibres in leather /hides/, and microscope observations and material analysis. Research laboratories staff participate in research, development and verification of new conservation and restoration methods and tests of different materials for conservation and restoration within the framework of research projects and grant tasks. Objective tests of conservation and restoration materials, both the non-aged and artificially aged, are performed by measuring their chemical, physical and mechanical, and purely physical properties. Laboratory staff monitor and evaluate climate parameters in depositories and exhibition spaces or, if need be, in other spaces that serve for handling library collections, and propose measures and adjustments. Part of the department is also a microbiological laboratory that performs microbiological tests and tests disinfectants and insecticides to treat library holdings and depositories, performs microbiological control of library collections, and carries out both individual and mass decontamination of microbially affected library collections.

1.5.2 Restoration

It is a unit on the level of a department, managed by a head.

It is responsible for restoration and conservation of unique written documents, illuminated manuscripts and historical library collections. It takes care of rare book collections from ambulant intervention through specific restoration treatment to general restoration of historical works. Restoration and conservation of library collections also include a detailed photodocumentation, restoration protocols and reports as well as preparation of special protective boxes. It conducts surveys of the condition of historical library collections and processes data into databases, consequently it assesses priorities of care for these collections. Staff of the

department participate in preparation, transport and installation of historical collections in exhibitions, they control climate parameters before the beginning and during the exhibitions. They are involved in solution of research and development projects.

1.5.3 Preventive Conservation

It is a unit on the level of a department, managed by a head.

It provides new bindings, re-bindings and repairs of the non-historical library collections. Based on proposals and requests it implements the programme of preservation of library collections in protective boxes made of suitable materials. It performs mechanical cleaning of library collections and methodologically ensures its execution by external contractors. It participates in preparing proposals for preventive measures against accidents and natural disasters, and in cooperation with other units and contractors also in coping with their consequences. It is involved in solution of research and development projects.

2.0.0 Digitization and Technologies

It is a unit on the level of a sector, managed by a deputy-director.

Its competence includes professional activities that concern the collections of documents in digital form. To other NL units, it provides support in the area of computer equipment, services and creation of related methodologies, policies and normatives. It ensures data and telephone communications including the operation of mobile phones. Within the scope of its competence and through the mediation of particular units, it ensures conceptual, coordination, methodological and control activities on the national and international level. It participates in research and development.

2.1.0 ICT Operation Support

It is a unit on the level of a division, managed by a director. It provides service and support to computer technologies users from among the NL employees. It provides services and capacities to applications and their administration. It provides services in preparing, implementing and operation of IT. It is responsible for complex application and infrastructure support within the NL. It provides the planned accessibility of services of ICT infrastructure administered by this division, its maintenance and monitoring. It is responsible for managing the business relations with IT suppliers and service providers. It is responsible for the registration of and compliance with SW licences. It submits proposals for standards and instructions to ensure information security and effective use of centralised IT sources. It submits documents for and collaborates on creation of the NL IT development strategy and enterprise architecture. It provides technical support to central information systems operated in the NL.

2.1.1 End User Support

It is a unit on the level of a department, managed by a head. The department provides support for all devices on the end user side and related subsequent processes of support to users from among the NL employees, consultancy and training. It cooperates on processing requests for HW and SW technology purchase. It is responsible for management and administration of user accounts' end devices – it administers end devices and mobile IT. It controls users' compliance with the safe use of IT. It sets up and administers users' profiles and accounts. It sets up access rights. It provides or arranges for the maintenance of end devices. It supervises the compliance with the licence agreements on the SW installed on the administered HW.

2.1.2 NL & NDL Infrastructure Support

It is a unit on the level of a department, managed by a head. It manages technological part of the NL IT infrastructure, including data centres, the central server platform, the central data storage system, and the computer and telephone network with its services. It plans and implements the processes of uninterrupted computer network services supply, system platform and data centres; it plans and implements their renewal and development. It manages projects of changes of the NL IT infrastructure technology. It sets technical standards that are obligatory for building IT infrastructure.

2.1.3 NL & NDL Application Support

It is a unit on the level of a department, managed by a head. The department provides technical support to the application administration and the operation of application systems of the NL. It is responsible for their

operability and the elimination of operational incidents; it monitors applications and their operation; it implements changes of application systems configuration; it plans capacities necessary for application systems operation. It participates in adopting decisions on implementing modified versions in the production operation. It cooperates with external services suppliers. The department proposes and implements measures to ensure policies to backup and restore the existing and new data (in collaboration with the NL data producers – the projects Kramerius, WebArchiv, Manuscriptorium, etc., if any).

2.2.0 Information Security and Processes

It is a unit on the level of a division, managed by a director. It plans and provides support to the key infrastructure elements and it arranges for the process of uninterrupted supply of the security system platform services and data flows, according to the Act No. 181/2014 Coll., on cybersecurity and according to the decrees No. 316/2014 Coll., and No. 317/2014 Coll. It plans and implements the reconstruction and development of ICT key infrastructure elements and it controls projects of changes of the NL ICT infrastructure technological parts. It establishes technical and technological standards within the organisation. It proposes registration and security standards for computer technology used by the NL employees. It collects pieces of information necessary for assessing the level of risks associated with providing operation of technological parts of the NL ICT infrastructure. It is responsible for business relationships with suppliers (contracts, tenders, it proposes policies in these areas), it checks compliance with the contracts, evaluates suppliers of material and services. It prepares documents for the strategy of the NL ICT development.

2.2.1 Information Security

It is a unit on the level of a department, managed by a head. It plans and provides for the processes of the key infrastructure elements and the supply of the security system platform services and data flows, according to the Act No. 181/2014 Coll., on cybersecurity and according to the decrees No. 316/2014 Coll., and No. 317/2014 Coll. It plans and implements the reconstruction and development of ICT key infrastructure elements and it controls projects of changes of the NL ICT infrastructure technological parts. It promotes and respects the available ISO norms, especially those of active security and reliability of ICT infrastructure. Using the ITIL processes, solutions, products, and services it sets up complex solutions as a whole to be completely in accordance with the NL needs. It solves incidents in the process area, especially it keeps the agenda – knowledge base – in the area of the process arrangement for the section operation.

2.2.2 Processes and Support

It is a unit on the level of a department, managed by a head. It provides for the process and analytical support of ICT operation. It submits proposals of contracts with external suppliers within the framework of its competences. It prepares methodologies, plans, and administration of the section and its operation including the superior agendas. It ensures the project coordination and creation of the process model of the section. It arranges for securing contacts between an external supplier and the organisation. It is responsible for providing all necessary inputs, the coordination of meetings, and the management of the schedule for the implementation of process modeling from the point of view of the contracting authority.

2.3.0 Digitization

It is a unit on the level of a division, managed by a director.

Within and outside the project Creation of the National Digital Library, it coordinates and carries out digitization of modern library collections in the NL and is involved in providing access to them through local and remote access. In coordination with other NL departments and partner institutions it selects and prepares library documents for digitization, creates image files from printed originals, and creates descriptive, structural and administration metadata. It cooperates with libraries, institutions and specialized establishments in the Czech Republic and abroad. Together with other NL departments it is responsible for the participation of the NL in joint projects and thus it contributes to the compliance with particular agreements in the area of library collections administration and preservation. Within the scope of its competence it provides coordination, methodological, advisory and consultancy service. It is involved in research and development.

2.3.1 Metadata Creation

It is a unit on the level of a department, managed by a head.

It processes digital image files and creates descriptive, structural, and administration metadata. It prepares data for imports of digitised documents or their parts in a prescribed structure for long-term archiving and access, and it prepares datasets to be registered in the Register of Digitizing. In its work it adheres to agreed standards and recommendations. Within the scope of its competence it proposes methodology, system changes, and standards, and it provides methodological and consultancy service. It is involved in the project Creation of the National Digital Library and in other national and European projects.

2.3.2 Scanning

It is a unit on the level of a department, managed by a head.

It performs final preparation of documents selected for digitizing and the scanning itself on robotic and manual scanners; it checks the quality and completeness of image files and, if need be, it also performs other operations connected with their processing. It is involved in creating methodology, testing and verification of functional properties of device. It provides methodological and consultancy service. In its work it adheres to agreed standards and recommendations. It participates in implementing the project Creation of the National Digital Library and in other national and European projects.

2.4.0 Digital Collections

It is a unit on the level of a division, managed by a director.

It is responsible for management, long-term preservation and access to the collections of digital documents, particularly to digitised analog publications, electronic publications (e-books), electronic pre-prints and web presentations. The division solves both technical and procedural issues of the activities mentioned above. It monitors and provides access to international standards in this area and consequently it creates and implements unified national standards. It covers the area of long-term preservation of digital data under the project Creation of the National Digital Library. Within the scope of its competence it provides coordination, methodological, advisory and consultancy service; authorised to do so are also the subordinate departments within the scope of their competence. It participates in research and development.

2.4.1 Web Archiving

It is a unit on the level of a department, managed by a head.

It is responsible for search, registration, preservation, and access to domestic web resources. It outlines the acquisition policy in this field, selects web resources and negotiates with their publishers about providing access licences. It describes the resources selected to be included in the NL catalogue and the Czech National Bibliography. In cooperation with internal and external establishments, it ensures information technologies to acquire and archive the "Czech web". In accessing, archiving and providing access to the online resources, it supervises the observance of the legislative conditions and prepares necessary legislative changes, if need be. It checks technical quality and makes necessary steps to secure the long-term access to the archived web contents. It develops methodology and takes part in research and development in national and international web archiving projects.

2.4.2 Preservation Standards

It is a unit on the level of a department, managed by a head.

The department finds, analyzes, implements, supports and develops standards necessary for long-term preservation (LTP) of digital data, such as metadata formats, unambiguous identifiers, image data formats etc. It monitors and evaluates expenditures connected with LTP of individual types of data. Within the NL, it monitors the adherence to and use of LTP standards in key systems (audit). It watches trends in this sphere and implements them into conception, functionality and adjustment of LTP system, into the way of coordination within the NL (digitising, web archiving etc.) and also into planning the preservation within the LTP system. An important role of the department is in its function of a coordinator within the whole Czech Republic, i.e. it provides consultancy in this field to other institutions. In order to ensure continuity between national standards and the international context, staff of the department is involved in national and above all international projects in this area. The department covers the area of LTP system standards within the project Creation of the National Digital Library.

2.4.3 LTP Storage

It is a unit on the level of a department, managed by a head.

It co-creates and implements conceptual development of the system for long-term preservation of digital data (LTP system), including the NL strategy in this area. It determines and ensures daily operation, administration and management of the LTP system content in terms of library processes so that the data have passed through all the processes and the system has fulfilled its function of providing long-term preservation of and access to archival digital documents. The department staff negotiate with data producers (both in the NL and outside it), publishers and other institutions that store or want to store their data in the LTP system. To acquire, archive and provide access to the digital documents, the department secures complying with the legislative conditions and, if need be, it prepares necessary legislative changes. In order to develop and keep the LTP system at the particular professional level, the department is involved in solutions of national and mainly international projects in this sphere. The department covers the area of daily operation, administration, content management and development of the LTP system within the framework of the project Creation of the National Digital Library. It monitors trends and, if need be, it tests and analyzes new solutions.

2.5.0 Economic Management

It is a unit on the level of a department managed by a head, reporting directly to the Deputy Director for Digitization and Technologies. It performs budgeting and financial management for IT services and oversees compliance with these budgets. It proposes financial plans, partial budgets and prepares documents on their implementing. It records requirements for procurement of material, mobile phones, IT components, SW and services. It participates in acceptance and control of supplies and it deals with any complaints.
