

Supplement No. 2: The Competence of the NL Units as of 1st June 2022

1.0.0 Sector for Library Collections and Services

It is a unit on the level of a sector (in Czech sekce), managed by a deputy director. It systematically acquires, catalogues, manages, and preserves National Archival Collection, Universal Library Collections and Study Collections. It manages Reserve Collections. It provides complex public library and information services related to the aforementioned collections and to the external collections and information sources as well. It serves as the National Bibliographic Agency and the CIP Agency, the National ISBN/ ISMN Agency. It serves as the National Centre of Interlibrary Loan (ILL) Services of the Czech Republic and the National Centre for International Exchange of Official Publications. It is the centre of the Union Catalogue of the Czech Republic and the centre of the National Name and Subject Authorities. It makes comments, suggestions, proposals and recommendations concerning cultural heritage in the legislative and normative processes. Through the mediation of particular professional units, it guarantees, within the sphere of its competence, the conceptual, coordination, and methodical service and control as well as cooperation on national and international levels, and participates in research and development.

1.1.0 Acquisitions

It is a unit on the level of a division, managed by a director. In accordance with the determined profile of acquisition (CONSPECTUS), it systematically acquires documents to the National Archival Collections, the Universal Collections, and the Study Collections. It guarantees parallel and retrospective acquisition of domestic documents (except for periodicals) and selective acquisition of foreign documents (except for purchase and gifts of periodicals). It keeps primary records of the acquired documents. It is the National ISBN/ ISMN Agency in the Czech Republic and the National Centre for International Exchange of Official Publications. Within the scope of its professional competence, it provides coordination, methodological, advisory and consultancy services, and authorized to do so are also the individual departments within their scope of competence. It participates in research and development.

1.1.1 International Numbering Agencies

It is a unit on the level of a department, managed by a head. It serves as the National ISBN/ ISMN Agency in the Czech Republic for the systems of international standard book and music numbering. It cooperates with the International ISBN and ISMN Agencies and with other national and group agencies. It participates in production and revision of international ISO standards for the sphere of ISBN, ISMN.

1.1.2 Domestic Acquisitions

It is a unit on the level of a department, managed by a head. Based on the current regulations, it acquires legal deposit copies of non-periodical publications and checks their complete submitting. By purchase or through gifts it acquires other copies of domestic documents for particular collections and workplaces. Retrospectively, it acquires the missing titles of domestic documents. It keeps primary records of newly acquired domestic documents. Based on the legal deposit copies, it prepares official retrospective statistics of the publishing production in the Czech Republic for the field of non-periodical publications.

1.1.3 Foreign Acquisitions

It is a unit on the level of a department, managed by a head. It acquires foreign documents for particular collections and workplaces by means of purchase, interlibrary exchange and gifts. In coordination with the Periodicals Department, it acquires foreign periodicals through interlibrary exchange. It functions as the National Centre for International Interlibrary Exchange of Official

Publications. It guarantees for the NL the compliance with the agreements on international interlibrary exchange of publications. It manages the exchange collections. It keeps the primary records of newly acquired foreign documents, except for periodicals.

1.2.0 Bibliography and Cataloguing

It is a unit on the level of a division, managed by a director. The basic mission of the division is to effectively process the modern library collections. It serves as the National Bibliographic Agency and the CIP Agency. It is the centre of the Union Catalogue of the Czech Republic and an administrator of the National Authorities. It monitors and makes available the international standards for bibliography and cataloguing, and provides access to them, and consequently, it creates and implements the unified cataloguing policy. It cooperates with libraries, institutions, and professional establishments in the Czech Republic as well as abroad, and is responsible for the NL participation in joint projects and for the observance of particular agreements. Within the scope of its professional competence it provides coordination, methodological, advisory and consultancy services, and authorized to do so are also the individual departments within the scope of their competence. It participates in research and development.

1.2.1 Descriptive Cataloguing

It is a unit on the level of a department, managed by a head. It is responsible for descriptive cataloguing of the domestic and foreign production of books and some types of continuing resources of the 20th and 21st centuries acquired to the NL collections in accordance with the valid international / national standards. It is charged with descriptive and subject cataloguing of the domestic and foreign production of books and some types of continuing resources of the 19th century. It is a subadministrator of the database of books and serials within the NL electronic catalogue and the Czech National Bibliography. It works as the National CIP Agency (Cataloguing in Publication). It coordinates the projects of shared and cooperative cataloguing of Czech books. It is a coordination, methodological and consultation centre for the sphere of descriptive cataloguing and name authorities, and it participates in research and development activities. Included in this department is the Section for OPAC Administration, which provides operative re-cataloguing of requested uncatalogued NL collections (in Czech: REŽIFO) and coordinates particular activities related to the administration of the NL Catalogue database within the National Library.

1.2.2 National Subject Authorities and Subject Cataloguing

It is a unit on the level of a department, managed by a head. It systematically builds up national subject authority files. It is responsible for subject cataloguing of domestic and foreign production of books and some types of continuing resources accessed into the NL collections in accordance with valid international / national standards. It is the administrator of the Czech National Subject Authority File within the Czech National Bibliography and the NL electronic catalogue. It is the administrator of subject access files of the NL electronic catalogue. It coordinates projects of shared and cooperative cataloguing of Czech books in the field of providing subject access. It serves as the National Agency for Translation and Access to the UDC classification system (UDC-MRF).

1.2.3 Special Documents Cataloguing

It is a unit on the level of a department, managed by a head. It is responsible for both descriptive and subject cataloguing of special documents (electronic sources on physical carriers, graphic documents, cartographic documents, microdocuments, video and audio recordings) acquired to the NL collections according to valid international/ national standards. It is the administrator of the database of special documents in the NL electronic catalogue and the Czech National Bibliography.

1.2.4 National Name Authorities

It is a unit on the level of a department, managed by a head. It systematically builds up files of National Name Authorities. It is an administrator of the National Name Authority database within the NL electronic catalogue and the Czech National Bibliography. It coordinates the cooperation of Czech libraries in building and using the National Name Authority Files. It is responsible for the content accuracy and uniformity of related access files to bibliographic records in the NKC database (NL online catalogue).

1.2.5 Union Catalogues

It is a unit on the level of a department, managed by a head. It builds up and administers the National Union Catalogue of the Czech Republic; on the basis of valid rules it organizes cooperation of participants in CASLIN – Union Catalogue of the Czech Republic (hereinafter Union Catalogue). It organizes the acceptance of records of printed and special documents, catalogued on the level of monographs and serials, into the Union Catalogue, including their quality control and removal of duplicates. It provides the allocation of siglas (i.e. location marks) and administers their system. It administers a directory of libraries and information institutions in the Czech Republic and provides access to it.

1.2.6 Retrospective Conversion

It is a unit on the level of a department, managed by a head. It coordinates and technically supports retrospective conversion of catalogues of both the NL and other Czech libraries, including a professional guarantee of the PLIS 5 Subprogramme - RETROKON (PLIS – Public Library and Information Services). It participates in research and development within the scope of its competence.

1.3.0 Public Services

It is a unit on the level of a division, managed by a director. In accordance with the NL Rules and Regulations, it provides complex public library and information services to library users. It builds up a system of general and specialized reading rooms with reference libraries and reference collections. According to the determined profile of acquisition (CONSPECTUS), it ensures the system of acquisition and cataloguing of domestic and foreign periodicals. With regard to the content, it participates in the NL collections acquisition, namely the Universal Collections and Study Collections. It is the National Centre of Interlibrary Loan Service in the Czech Republic. Within the scope of its professional competence, it provides coordination, methodological, advisory, and consultancy services. Authorized to do so are also individual subordinate units within the scope of their competence. It participates in research and development work.

1.3.1 Reader Services

It is a unit on the level of a department, managed by a head. In accordance with the NL Rules and Regulations, it provides check-out loan services from the Universal Collections and Study Collections in the Main Hall, it provides professional and methodical information on the NL collections and develops individual and collective forms of work with users. It keeps files of the NL registered users and administers an automated loan system. It keeps records of the lost loans and takes care of their replacement, it prepares documents to claim them legally. As part of the modernization of services, it provides support for self-service book returns via the NL returns box, it manages the remote registration process and assists users (especially the unregistered ones) in accessing digitized documents. It offers self-service copying and provides photocopying and other reproduction services made to order. It is responsible for a central cash register for the NL users. It participates in acquisitions to the Universal Collections and Study Collections with regard to their content.

1.3.2 Reading Rooms

It is a unit on the level of a department, managed by a head. In accordance with the NL Rules and Regulations, it provides check-in loans of printed and non-printed documents published from 1801 on, which are part of the NL Universal Collections, Study Collections and Reserve Collections, to the General Reading Room, Social and Natural Science Reading Room and Scholars Reading Room. It participates in administrative management of this part of the collections' circulation. It provides access to the National Digital Library, to publicly available NL databases, selected licensed databases and the Internet. It builds up reference libraries in individual reading rooms. It builds up information tools related to the collections in its administration. It provides information and consultancy service especially in social and natural sciences, self-service copying, it mediates photoduplication and other reprographic services made to order. It participates in acquisition to the Universal Collections and Study Collections with regard to the content.

1.3.3 Reference and Interlibrary Loan Services

It is a unit on the level of a department, managed by a head. In accordance with the NL Rules and Regulations it provides mainly reference services, interlibrary loans (ILL) and other specialized services in the NL Reference Centre. It provides self- service copying and mediates reproduction services made to order. It provides access to electronic information sources and internet and organizes training to work with them. The department provides both in-house and remote services, including virtual reference services – Ask your library. It builds up and administers a reference library of the Reference Centre It performs the function of the National Centre of ILL Service in the Czech Republic. It represents the ILL Service in the Czech Republic in negotiations with national centres of other countries and international organizations. It is a retrieval centre in the National Library. It participates in acquisition to the Universal Collections and Study Collections with regard to the content.

1.3.4 Periodicals

It is a unit on the level of a department, managed by a head. Based on the rules and regulations in force, it acquires legal deposits of printed periodicals and controls the completeness of their depositing. By purchase, exchange - in cooperation with the Foreign Acquisition Department - and gifts, it acquires domestic and foreign periodicals for particular collections and departments. Retrospectively, it acquires missing periodical titles above all of the Bohemical character. It keeps the primary and continuous records of acquired periodicals. Based on legal deposits, it completes official complex statistic files of the printed periodical publishing production in the Czech Republic. It provides descriptive and subject cataloguing of printed periodicals in accordance with valid international / national standards. According to the NL Rules and Regulations, it provides access to contemporary Czech and foreign periodical literature in the Periodicals Reading Room. It provides self- service copying as well as photoduplication and other reproduction services made to order. It provides access to selected online information sources. It administers open access collections and a collection of unbound periodicals.

1.3.5 Services Development and Technical Support

It is a unit on the level of a department, managed by a head. It executes reprographic and photoduplication services to order for direct user services within the scope competence of the NL Services Department and other NL departments and workplaces. It participates in the reformatting of the NL holdings. It provides technical support to project leaders by producing photographic documentation for them. It ensures photographic documentation of the NL social and cultural activities.

1.4.0 Collections Management

It is a unit on the level of a division, managed by a director. The basic mission of the division is to effectively administer, build up and preserve the NL modern book collections, i.e. the National Archival Collection, Universal Library Collections, Reserve Collections and other partial collections. The division is comprehensively engaged also in other professional activities connected with the organization, revision and storage of the aforementioned collections. It is responsible for the selection and preparation of the NL modern library holdings for digitization; it coordinates digitization activities within the wide range of Czech libraries and other institutions. Within the scope of its professional competence, it provides conceptual, coordination, methodological, advisory and consultancy services to other organizations including the Ministry of Culture of the CR; authorized to do so are also individual departments within the scope of their competence. Staff of this division participate in research activities of the NL in the field of permanent preservation, effective management, digitization and availability of modern documents including a new area of the so-called digital humanities.

1.4.1 Collections Organization

It is a unit on the level of a department, managed by a head. It is the output place of the cataloguing line, i.e. by means of providing new accessions with shelfmarks it organizes the arrangement of library collections in stacks and makes their adjustment, it proposes changes in the system of shelfmarks, organization and building up the collections, it manages local catalogues and lists. It makes corrections and redactions of selected records in OPAC, it provides documentary evidence and arranges for binding of volumes according to the agreed criteria in an internal or external binding office; it participates in checks of the completeness of accessions passed through the processing lines and sends the results to particular departments.

1.4.2 Collections Revision

It is a unit on the level of a department, managed by a head. It makes routine periodic and occasional revisions of library collections in accordance with valid legal regulations, it reviews the cases of temporarily missing library units, it submits the units to be written off and, when approved, it writes them off the NL collections. Based on the results of revisions, it prepares materials for updates and acquisitions to the Universal Collections, it participates in searches for replacements of library losses. It builds up and provides access to the archival collection of the 19th century, monographs and periodicals. It selects and marks library units that need special preservation and builds up a collection available in a special protective regime. It submits proposals for reformatting the most damaged publications and keeps records of the progress of their further processing. It monitors and registers moves of library collections for the needs of reference libraries, it registers deposited collections, revision losses, write-offs and other card indexes for the need of the revision including their gradual transfer into automated databases.

1.4.3 National Archival Collections Management

It is a unit on the level of a department, managed by a head. It builds up, protects, permanently preserves and in accordance with particular regulations it provides access to the National Archival Collections, i.e. the archival collection of domestic and foreign Bohemical documents, both printed and non-printed ones, including the periodical literature. It is an output department of the processing line for the National Archival Collections; it provides signs and adjustments, it selects publications to be bound, it builds up and manages local catalogues and card indexes. It participates in checking the completeness of accessions through the processing lines and sends the results to particular departments. It proposes the individual documents and their sets to be included in the National Archival Collections. It provides bibliographic information, consultancy and advisory services in the field of Bohemical literature of the 20th and 21st centuries. It gradually transfers the data

about library units kept in the National Archival Collections into the online database. It manages the operation of the special National Archival Collections Reading Room. It collaborates on projects focused on digitization, preservation, and mapping of the NL holdings.

1.4.4 Universal Collections Management

It is a unit on the level of a department, managed by a head. It manages the Universal Library Collections, the Study Collections and other partial collections, and participates in their organization. It is responsible for their purposeful and safe storage as well as doing checks in this sphere; it submits proposals for measures to particular organizational units. It provides access to the Universal Library Collections, particularly it delivers the requested items from the stacks, puts the returned volumes back to their proper places and shelves new accessions, it collaborates on their adjustment and organizes moves of the collections. It participates in entering the data about damaged and reformatted titles into OPAC and it is involved in surveys of the collections condition and their minor repairs. It carries out basic revisions of arrangement in individual shelfmarks.

1.4.5. Central Depository Library

It is a unit on the level of a department, managed by a head. It is responsible for building and managing the NL Reserve Collections. It is responsible for building a new Central Depository Library, the transformation of the existing NL Reserve Collections into the Central Depository Library and for its future management and acquisition. It negotiates with other public libraries about the methods of discarding documents from their holdings, it actively takes over these documents and jointly decides about their use in the NL modern collections. It collaborates on projects focused on digitization, preservation, and mapping of the NL holdings.

1.4.6 Coordination of Library Collections Administration and Reformatting Procedures

It is a unit on the level of a department, managed by a head. It participates in forming the concept and strategy of digitization of modern library collections at the national level. It coordinates the selection of titles for digitization with respect to strategic objectives and current needs of the individual NL units. Regarding the selection of titles for digitization, it communicates with other memory institutions that manage book collections. It manages the tool *Navrhnutí k digitalizaci* [Propose for Digitization]. It addresses copyright holders for possible cooperation on digitization and it physically ensures the requests for loans of missing volumes intended for the completion of titles inside and outside the NL. It prepares, negotiates, concludes, and registers the contracts on loans for the purpose of digitization, the replication agreements, and the microfilm deposit agreements. The department coordinates the National Sub-Programme VISK 7, in which it leads the consultancy activities and controls the projects of individual applicants. It prepares partial statistics of the programme implementation, it organizes regular VISK 7 seminars, and it communicates with individual workplaces. On behalf of the NL it prepares a project for this sub-programme. It also actively participates in implementing other activities included in the grant mechanism of the Ministry of Culture of the CR, like the deacidification of documents endangered by the degradation of acid paper, the survey of physical condition of modern holdings including mapping of the structure of original owners, or the purchase of cardboard necessary for the production of protective storage boxes. It prepares and implements research and development projects focused on the development of working tools, procedures and methodologies in the field of collections management. It keeps the agenda of stored microfilms, it is responsible for their registration and control. It ensures promotion of the results of research projects and their application in the form of lectures, expert presentations, and publishing activities.

1.4.7 Library Collection Selection for Reformatting

It is a unit on the level of a department, managed by head. It selects and prepares library documents

for digitizing, it checks their physical condition and the state of cataloguing, it examines duplicates of the selected documents. Based on performed basic findings it decides on further cataloguing. It lends documents in ALEPH System and keeps records on the selected documents in the Register of Digitizing. It creates basic data files (metadata) for further processing. In its work, it adheres to agreed standards and recommendations. Within the scope of its competence it proposes methodology, system changes and standards, and it provides methodological and consultation service. It is involved in the operation of the National Digital Library and in implementing other national and European projects, it participates in research and development.

1.5.0 Collections Preservation

It is a unit on the level of a division, managed by a director. It is responsible for complex preservation and care of the physical condition of library collections. Its activity is focused on monitoring climate parameters and cleanliness of depositories for library collections storage; on individual and mass conservation and restoration of library collections, bookbinding and other preservation activities. It is involved in planning and implementing preventive measures against accidents and natural disasters and coping with their consequences. It submits observations, initiatives, proposals, and recommendations within the bounds of legislative and normative process. It collaborates with libraries, institutions and professional establishments both in the Czech Republic and abroad, and is responsible for the NL participation in joint projects and compliance with the particular agreements in the sphere of library collections preservation. Within the scope of its professional competence, it provides coordination, methodological, advisory and consultation service. Authorized to do so are also individual departments within the scope of their competences. It participates in research and development.

1.5.1 Development and Research Laboratories

It is a unit on the level of a department, managed directly by the Division's Director. The activity of the department is focused on initial analysis of the condition of damaged books, such as determining Ph values, i.e. acidity of paper, shrinkage temperature of cellulose fibres in leather /hides/, and microscope observations and material analysis. Research laboratories staff participate in research, development and verification of new conservation and restoration methods and tests of different materials for conservation and restoration within the framework of research projects and grant tasks. Objective tests of conservation and restoration materials, both the non-aged and artificially aged, are performed by measuring their chemical, physical and mechanical, and purely physical properties. Laboratory staff monitor and evaluate climate parameters in depositories and exhibition spaces or, if need be, in other spaces that serve for handling library collections, and propose measures and adjustments. Part of the department is also a microbiological laboratory that performs microbiological tests and tests disinfectants and insecticides to treat library holdings and depositories, performs microbiological control of library collections, and carries out both individual and mass decontamination of microbially affected library collections.

1.5.2 Restoration

It is a unit on the level of a department, managed by a head. It is responsible for restoration and conservation of unique written documents, illuminated manuscripts and historical library collections. It takes care of rare book collections from ambulant intervention through specific restoration treatment to general restoration of historical works. Restoration and conservation of library collections also include a detailed photodocumentation, restoration protocols and reports as well as preparation of special protective boxes. It conducts surveys of the condition of historical library collections and processes data into databases, consequently it assesses priorities of care for these collections. Staff of the department participate in preparation, transport and installation of historical

collections in exhibitions, they control climate parameters before the beginning and during the exhibitions. They are involved in solution of research and development projects.

1.5.3 Preventive Conservation

It is a unit on the level of a department, managed by a head. It provides new bindings, re-bindings and repairs of the non-historical library collections. Based on proposals and requests it implements the programme of preservation of library collections in protective boxes made of suitable materials. It performs mechanical cleaning of library collections and methodologically ensures its execution by external contractors. It participates in preparing proposals for preventive measures against accidents and natural disasters, and in cooperation with other units and contractors also in coping with their consequences. It is involved in solution of research and development projects.

2.0.0 Sector for Digitization and Technologies

It is a unit on the level of a sector, managed by a deputy-director. Its competence includes professional activities that concern the operation of the NL internal and external ICT systems and collections of documents in digital form. It provides support in the area of computer equipment, services and creation of related methodologies, policies and normatives. It ensures data and telephone communications including the operation of mobile phones. Within the scope of its competence and through the mediation of particular units, it ensures conceptual, coordination, methodological and control activities on the national and international level. It participates in research and development.

2.1.0 ICT Division

It is a unit on the level of a division, managed by a director. The division provides technical support to central information systems operated by the NL as well as the application and infrastructure administration of IT systems, service and support to users of computer technologies in the NL. It provides services in preparation, realization and operation of ICT. It provides the planned accessibility of services of ICT, its maintenance and monitoring. It is responsible for managing the business relations with ICT suppliers and service providers. It submits proposals for effective use of centralized IT sources, it submits documents for and collaborates on creation of the NL IT development strategy and enterprise architecture.

2.1. User Support Department

It is a unit on the level of a department, managed by a head. The department provides support for all devices on the end user side and related processes of support including consultation and training. It is responsible for management and administration of user profiles and accounts, access rights, end devices, and mobile ICT. It controls users' compliance with the safe use of ICT. It provides or arranges for the maintenance of end devices.

2.1.2 ICT Operations Department

It is a unit on the level of a department, managed by a head. It manages technological part of the NL ICT infrastructure, including that in the NL data centres, the central server platform, the central data storage system, and the computer and telephone network with its services. It plans, ensures and implements the processes of uninterrupted computer network services supply, system platform and data centres; it plans and implements their renewal, development, changes of the NL ICT infrastructure. The department provides policies for backup and recovery of existing and new data. It keeps operational documentation up to date and adheres to technical standards are obligatory for building ICT infrastructure.

2.1.3 Kramerius Operations Department

It is a unit on the level of a department, managed by a head. The department provides technical and methodical support to the operation of the Kramerius library system. It monitors its operability and is responsible for capacity planning, implementing changes of configuration, and elimination of operational incidents. As part of the assessment of the compliance of the release plan, the state of testing and operational needs, the department co-decides on implementing modified application versions in the production operation. It keeps the operational documentation up to date. It is involved in the development of application frameworks and cooperates with external service suppliers. It participates in specific planning and development of applications and it conducts the institutional research on the application of machine reading to the NL.

2.1.4. Library System Department

It is a unit on the level of a department managed by a head. It is responsible for the operation of the integrated library system, it ensures testing and implementing of new versions of the system and other subsystems, as well as their permanent maintenance and system supervision. It prepares imports and exports from databases operated in the library system. The department coordinates document processing in the line and outputs from the library system. It provides training sessions to the NL staff needed for work with the library system. Its staff is involved in research and development in the field of its competence. It cooperates with all the NL units.

2.2.0 Information Security Department

It is a unit on the level of a department, managed by a head, reporting directly to the Deputy-Director for Digitization and Technologies. It sets internal technical and technological standards of the organization. It proposes standards of registration and protection of computer technology used by employees. It collects information necessary to evaluate the degree of risks associated with ensuring the operation of the technological part of the NL ICT infrastructure. It proceeds in compliance with the available ISO standards, especially those on active security and reliability of ICT infrastructure using ITIL processes. It coordinates and manages incidents in the process field, and executes activities related to the requests of individual users by means of the SD central system.

2.4.0 Digital Collections Division

It is a unit on the level of a division, managed by a director. It is responsible for management, long-term preservation and access to the collections of digital documents, particularly to digitised analog publications, electronic publications (e-books), electronic pre-prints and web presentations. The division solves technical, procedural, methodical and coordination issues of the activities mentioned above as well as the methodical an. It monitors and provides access to international standards in this area and consequently it creates and implements unified national standards. It covers the area of long-term preservation of digital data implemented under the project The Creation of the National Digital Library. Within the scope of its competence it provides coordination, methodological, advisory and consultancy service; authorised to do so are also the subordinate departments within the scope of their competence. It participates in research and development.

2.4.1 Web Archiving Department

It is a unit on the level of a department, managed by a head. It is responsible for search, registration, preservation, and access to domestic web resources. It outlines the acquisition policy in this field, selects web resources and negotiates with their publishers about providing access licences. It describes the resources selected to be included in the NL catalogue and the Czech National Bibliography. In cooperation with internal and external establishments, it ensures information

technologies to acquire and archive the "Czech web". In accessing, archiving and providing access to the online resources, it supervises the observance of the legislative conditions and prepares necessary legislative changes, if need be. It checks technical quality and makes necessary steps to secure the long-term access to the archived web contents. It develops methodology and takes part in research and development in national and international web archiving projects.

2.4.2 Department of Standards

It is a unit on the level of a department, managed by a head. The department finds, analyzes, implements, supports and develops standards necessary for long-term preservation (LTP) of digital data, such as metadata formats, unambiguous identifiers, image data formats etc. It monitors and evaluates expenditures connected with LTP of individual types of data. Within the NL, it monitors the adherence to and use of LTP standards in key systems (audit). It watches trends in this sphere and implements them into conception, functionality and adjustment of LTP system, into the way of coordination within the NL (digitising, web archiving etc.) and also into planning the preservation within the LTP system. An important role of the department is in its function of a coordinator within the whole Czech Republic, i.e. it provides consultancy in this field to other institutions. In order to ensure continuity between national standards and the international context, staff of the department is involved in national and above all international projects in this area. The department covers the area of LTP system standards implemented within the project The Creation of the National Digital Library.

2.4.3 LTP Storage

It is a unit on the level of a department, managed by a head. It co-creates and implements conceptual development of the system for long-term preservation of digital data (LTP system), including the NL strategy in this area. It determines and ensures daily operation, administration and management of the LTP system content in terms of library processes so that the data have passed through all the processes and the system has fulfilled its function of providing long-term preservation of and access to archival digital documents. The department staff negotiate with data producers (both in the NL and outside it), publishers and other institutions that store or want to store their data in the LTP system. To acquire, archive and provide access to the digital documents, the department secures complying with the legislative conditions and, if need be, it prepares necessary legislative changes. In order to develop and keep the LTP system at the particular professional level, the department is involved in solutions of national and mainly international projects in this sphere. The department covers the area of daily operation, administration, content management and development of the LTP system implemented within the project The Creation of the National Digital Library. It monitors trends and, if need be, it tests and analyzes new solutions.

2.4.4 Metadata Department

It is a unit on the level of a department, managed by a head. It processes digital image files and creates descriptive, structural, and administration metadata of the digitized documents. It prepares data of the digitized documents or their parts for long-term archiving in the LTP system and for accessing through the Kramerius Digital Library. It is involved in running operation and the development of a digitization line implemented within the project The Creation of the National Digital Library. Within the scope of its competence it formulates standards and recommendations to process image files and descriptive metadata, it proposes methodologies and system changes, and provides consultancy service within the Czech Republic. It is involved in realization of national and European digitization projects.

2.4.5 Scanning Department

It is a unit on the level of a department, managed by a head. It performs final preparation of documents selected for digitizing and the scanning itself on robotic and manual scanners; it checks the quality and completeness of image files and, if need be, it also performs other operations connected with their processing. It is involved in creating methodology, testing and verification of functional properties of device. It provides methodological and consultancy service. In its work it adheres to agreed standards and recommendations. It is engaged in running operation and the development of a digitizing line implemented within the project The Creation of the National Digital Library and in implementing other national and European projects.

2.5.0 Processes & Support Department

It is a unit on the level of a department managed by a head, reporting directly to the Deputy Director for Digitization and Technologies. It provides process and analytical support to the ICT operation. It proposes contracts with external suppliers within the scope of its competence. It prepares methodologies and plans and is responsible for administration of the D&T sector and its operation including the agenda of senior units. The department provides project coordination and creates the process model of the section. It arranges for contacts between external suppliers and the NL. It ensures the necessary inputs, coordination of meetings, keeping a schedule for the implementation of process modeling from the perspective of the client. It performs budgeting and financial management for IT services and oversees compliance with these budgets. It proposes financial plans, partial budgets and prepares documents on their implementing. It keeps records of requirements for procurement of material, mobile phones, IT components, SW and services. It participates in delivery acceptance and control and it deals with any complaints. It provides registration and management of tangible and intangible assets in IT systems throughout their life (property registration, licence administration and their documentation, proposals for disposal of assets).

3.0.0 Sector for Economy and Operation

It is a unit on the level of a sector, managed by a deputy director. It guarantees complex management of economy, finance, budget and personnel policy. It is responsible for administration and operation of all the NL buildings and premises. It controls implementation of the investments in accordance with approved plans. It manages repairs and maintenance of all immovable and movable assets in possession of the NL. It provides basic material and technical conditions necessary for work of the other NL organizational units. It provides coordination and methodological service and control within the scope of its competence, including grant projects. It monitors new trends in the branch in question and submits proposals for their application.

3.1.0 Economy and Budget

It is a unit on the level of a division, managed by a director. It ensures complex economic and financial agenda of the NL.
